JOINT REPORT

OF THE VICE CHAIRMAN AND THE DIRECTOR

June 30, 1963

The Honorable Jimmie H. Davis Governor of the State of Louisiana Baton Rouge, Louisiana

Dear Governor Davis:

The Vice-Chairman and the Director of the Board of Administrators of the Charity Hospital of Louisiana at New Orleans submit the following report of the activities of the hospital for the fiscal year July 1, 1962 through June 30, 1963.

Mr. John W. Bowen was re-elected Vice Chairman of the Board and Dr. Leo J. Kerne was reappointed Director.

The following members continued to serve on the Board of Administrators:

Mr. Sam J. Arcuri Mr. Thomas J. Bethune Mr. John W. Bowen Dr. Willard A. Ellender Dr. A. N. Houston Mr. I. J. G. Janssen Dr. M. O. Miller

Mr. Thomas C. Nugent Mr. Sterling Robichaux Dr. Rhodes Spedale Mr. Louis E. Thomas, Jr. Dr. Gilbert C. Tomsky Mr. George Van Kuren Dr. David J. Vial

Mr. Weldon Talley resigned from the Board to become Secretary-Treasurer due to the resignation of Mr. Donald C. Oster. In his place, Mr. Thomas J. Bethune was appointed September 25, 1962.

The Members serving on the various committees are as follows:

Finance Committee:

Mr. Irvin J. G. Janssen, Chairman

Dr. Rhodes Spedale Mr. Thomas J. Bethune

Mr. Thomas C. Nugent Mr. John W. Bowen

Medical Committee:

A. N. Houston, M.D., Chairman Dr. Gilbert C. Tomsky Dr. M. O. Miller Dr. Don L. Peterson

Dr. Rhodes J. Spedale Dr. David J. Vial Dr. Willard A. Ellender Mr. John W. Bowen

House Committee:

Mr. L. E. Thomas, Jr., Chairman Mr. George Van Kuren Mr. Thomas C. Nugent Mr. Sam J. Arcuri Mr. Sterling J. Robichaux

Dr. David J. Vial Mr. Thomas J. Bethune Mr. John W. Bowen

The cost of operations for this period increased \$13,175.37 over the previous year. Drugs and surgical supplies represented the largest increase in the amount of \$55,939.95. Salaries and foods and other operating expenses decreased. The State appropriated \$14,534,620.00 and in addition we had \$275,025.92 from the Endowed Funds, \$69,002.52 from Federal and other grants and \$83,500.00 from Endowed Funds. The total cost of operations was \$14.962.079.78 leaving an unencumbered balance of less than one hundred dollars.

ACKNOWLEDGEMENTS

The Vice-Chairman and the Director of the hospital wish to express their appreciation to the Sisters of Charity for their splendid cooperation and excellent services rendered innumerous capacities; also, to the various members of the Board of Administrators for the valuable services rendered through this year and to the Department heads and the entire personnel of Charity Hospital for their wonderful Loyalty and cooperation.

Respectfully submitted,

JOHN W. BOWEN Vice Chairman Board of Administrators

LEO J. KERNE, M.D. Director

COMMENTS ON OPERATIONS

June 30, 1963

The cost of operations for the period July 1, 1962 to June 30, 1963, as compared with the same period last year increased \$13,175.37 as per the following summary:

	1963	1962	Increase or Decrease*
Salaries	10,217,454.50 956,049.17 1,824,912.21 276,823.76 1,429,027.96	\$10,241,911.93 980,202.16 1,768,972.26 258,165.86 1,441,840.02	\$24,457.43* 24,152.99* 55,939.95 18,657.90 12,812.06*
Total Cost of Operations	14,704,267.60	\$14,691,092.23	\$13,175.37

Cost of operations for the month of June, 1963, as compared with May, 1963 increased \$2,366.60 as per the following summary:

	June	May	Increase or Decrease*
Salaries	915,136.34 74,500.91 118,768.76 79,522.30 25,498.60 48,047.97	\$ 838,983.53 81,925.11 187,409.21 80,028.22 26,704.89 44,057.32	\$76,152.81 7,424.20* 68,640.45* 505.92* 1,206.29* 3,990.65
Total Cost of Operations\$	1,261,474.88	\$ 1,259,108.28	\$ 2,366.60

And the state of t

PERSONNEL

This year witnessed a number of improvements and advances made with the approval of our Board of Administrators and with the assistance of the Department of State Civil Service.

- Pay scales for Graduate Nurses I and II, Switchboard Operators I, II and III and the Accountant Series were increased.
- A classification survey of all Practical Nurse positions with supervisory responsibilities was begun by a representative of the Department of State Civil Service and we are to receive recommendations for any necessary reallocations.
- Employees seventy years of age and over were retired on December 31, 1962.
- Employees sixty-five to sixty-nine years of age were required to take a physical examination in order to remain on the job.
- The Visitors' Food Services were closed and all employees were placed in other Hospital divisions.
- The Hospital again participated in the Public Employees' Training Institute, sending four of its staff to the PETI meetings.
- Step increases were given to all employees eligible for them on May, 1963 and on each anniversary date thereafter until July 1, 1963.

Employees of the Hospital also came in for special honors during the year.

- Mrs. Eddie V. Cooksey, Medical Record Librarian III, was one of eight recipients in the State of the Charles E. Dunbar, Jr. Career Service Award. Miss Jeanette M. Fontan received honorable mention for this award.
- Seven employees of the Hospital were awarded Outstanding Service Ratings in March. These employees are:

Miss Sadina Bertucci Mr. Clifford Darby Miss Marion Hood, Ph.D. Mrs. Camille Kunnes Mr. Samuel Pickett Miss Patricia Sallas Mrs. Eola Strauch

During the year, there were an average of 3,987 positions on the books. We employed an average of 108 persons a month, resigned an average of 99.8 persons a month and discharged an average of 9.8 persons each month.

As in the past, we have enjoyed the complete cooperation and consideration of the Administration and of all members of the staff. This cooperation is most helpful and we appreciate it.

Respectfully submitted,

/s/ CHARLES C. STURTEVANT Personnel Director

SISTERS' DIVISIONS

Director's Report

This has been a year of momentous change for the Sisters' Division. The hospital year which has just drawn to a close has witnessed much that is new and different in the Sisters' Division, even to a change in administration. The division lost the leadership of Sister Margaret, who was transferred to St. Louis, and this responsibility was assumed by Sister Alphonsa, who became Director of the Sisters' Division, Charity Hospital, in September, 1962. Shortly thereafter, two new Sisters were assigned to the Nursing Service Department of Charity Hospital—Sister Constance, as Director of Inservice Education, and Sister Edith, as Supervisor of the Emergency. Admitting and Observation Rooms. The Charity Hospital School of Nursing was not immune to changes, for Sister Pauline, Director of the school, was transferred from New Orleans and was replaced by Sister Blanche in the spring of 1963.

Numerous changes also took place within the Departments which comprise the Sisters' Division. In the Nursing Service Department, Sister Regis was appointed Director of Nursing Service, a position which had been vacant since the death of Sister Laurence in April, 1962. Sister Caroline became Supervisor of fourth floor, replacing Sister Mary Joseph, who left New Orleans. Sister Michael Ann assumed the responsibility of the Radium Wards, in addition to the eighth floor Medical Division of which she was already Supervisor. The Department suffered a great loss when Sister Patricia, Supervisor of the Operating Rooms, was transferred to California, but we were indeed fortunate in securing the services of Sister Mary Louise in this very important position. Sister Mary Louise has had extensive experience in Operating Room administration.

In the Nursing Service Department, the picture looks brighter for the coming year. The untiring efforts sown by the Nursing Service Administrative Staff will soon bear fruit. One-third of our graduating senior nursing students have accepted positions on our nursing staff, with perhaps others to come at a later date. A number of young nurses have been recruited from outside of New Orleans to report for duty at the beginning of September. Unfortunately, our practical nurse staff has diminished during the past year, and our low beginning salary for practical nurses makes it highly improbable that this trend will reverse itself in the future.

A change of major importance took place when Sister Pauline, Director of the Charity Hospital School of Nursing, was transferred from New Orleans. She was ably replaced by Sister Blanche, who is well qualified and experienced in administering a school of nursing, and the school retained its state and national accreditation during the year. Plans are being made to accommodate the large classes which the school hopes to admit this fall and each year thereafter. The faculty is being developed through intensive inservice training for its role in the preparation of young women for nursing in the complex world of tomorrow. Affiliation with out-of-state schools of nursing has been virtually discontinued because of anticipated increased enrollment in our own school and inability to recruit qualified instructors. The school is in need of major repair, renovation and refurnishing, and it is hoped that the future will bring about these changes, as well as air-conditioning of the building.

In the Housekeeping Department, consistent efforts were continued to maintain a sanitary and pleasing environment throughout the many buildings which comprise the hospital plant. In addition to routine cleaning, the department maintained Pest Control Services and arranged for regular Window Washing Services by a commercial company. The hospital was supplied with necessary linen through the Linen and Sewing Rooms, and thousands of linen replacements were made and placed in circulation by the department.

The Sisters' Residence has been waterproofed and the outside trim painted. This adds greatly to the appearance of the building. The well-worn car was replaced and a carport is being built for the new one adjacent to the Sisters' Residence.

The increase in salary which was granted to most hospital employees in May, 1963, has done much to improve the morale of the employees of the Sisters' Division. This will tend to stabilize the staff and to decrease the high percentage of job turnover which necessitates constant inservice training in order to function. A proposed increase in the basic salary of general duty nurses and head nurses will further improve our prospects for filling vacant positions and thereby increasing the amount of professional nurse service which is so essential, not only to proper patient care but to hospital accreditation.

The Sisters' Division wishes to take this opportunity to express our appreciation to the Board of Administrators and to the Administrative Staff of Charity Hospital for the whole-hearted cooperation and assistance of the past year.

Respectfully submitted,

/s/ SISTER ALPHONSA Director, Sisters' Division

Nursing Service

Director, Sisters' Divisions Sister Alphonsa, R.N., B.S., F.A.C.H.A.

Director, Nursing Service Sister Regis, R.N., B.S., N. Ed.

Assistant Director, Nursing Service Willie B. Mask, R.N., B.S., N. Ed.

Co-ordinator, In-Service Education Sister Constance, R.N., M.S.N.

Instructor Supervisors

Janie Quinn, R.N.

Professional Nurse Staff Supervisors

Daughters of Charity Lay Supervisors Assistant Supervisors Head Nurses General Duty Nurses	5 75
Full time	80 7
Part time	20 } 100
Practical Nurses	
Psychiatric Aides	
Nurse Aides II & III	
Nurse Aides I	77
Central Service Workers	136
Clerical Personnel	89
Miscellaneous Personnel	

A comparison of the above statistics with those in the last annual report could lead to the conclusion that there is stability in the staff of

the Nursing Service Department. The only obvious change is in the practical nurse staff which dropped to 283, a reduction of 23 practical nurse employees. The turnover in employment at the head nurse, general duty nurse and practical nurse levels, however, was appreciable, a continuation of a general trend in recent years. Leaving the city, home responsibilities, and to accept better-paying positions are the reasons most frequently given for termination of employment.

ADMINISTRATIVE CHANGES

The Nursing Service Department functioned without a full-time appointed director for ten months of the past year. The Director of the Sisters' Division who was given this additional responsibility in April 1962 was transferred and the present Director of the Sisters' Division, Sister Alphonsa, continued to serve in a dual capacity until May 1, 1963. On this day Sister Regis, former Supervisor of the Admitting, Emergency and Observation Rooms was appointed Director of Nursing Service.

Sister Constance, Coordinator for In-Service Education came to Charity Hospital in October 1962. With attention today focused on job training and growth of the individual nurse for better patient care, the department was fortunate to obtain the full-time services of a nurse with special preparation in this area of nursing.

In September 1962 the management of the nursing care of the patients on the Male Medicine and Radium Wards was allocated to one supervisor and Sister Michael Ann was given this responsibility. This action resulted in better utilization of the nursing personnel on the 8th floor and promoted continuity of patient care through a closer working relationship between the nursing staffs on the two services.

Sister Caroline, former Nursing Supervisor of the nursing services in the Radium Division, was assigned to the 4th floor. The general surgery floor is always a heavy service burdened with more patients than beds and it presents a real challenge to the nursing personnel. Reorganization of the nursing service staff to initiate the team approach to nursing and to provide more effective supervision and economy of operation has had a beneficial effect on job performance. The improvement, evident in the environment and nursing care of the patients, is a credit to the nursing staff because of the gradual but steady loss of nurses on this service. At this time there are 19 vacant nurse positions on the 4th floor.

As Supervisor of the Admitting, Accident and Observation Rooms, Sister Edith is working toward the improvements begun by her predecessor. The increasing demand for maximum nursing care in these units requires the nursing staff to be alert to new procedures and practices in nursing and treatment services.

After many years of service as Supervisor of the Operating and Recovery Rooms, Sister Patricia was transferred at a time when plans for complete reorganization of these departments were developing. This work has been started by her successor, Sister Mary Louise, and with total patient care the ultimate goal in the planning activities, she has made valuable contributions to the effectiveness of operation and to the teaching and research programs. Recognizing and accepting the fact that the recruitment and maintenance of a registered nurse staff for operating room duty is not feasible today, a program of re-orientation and a study of personnel utilization were initiated, and the operating room technician trainee course was increased to two classes a year instead on one. Committees have been formed to decide on physical changes, develop procedures, discuss policy proposals and revisions, and to evaluate supply and equipment needs. A central communications system is in the process of completion and plans are being made for the initiation of a patient-preparation area for minimizing delays in pre-operative routines.

SERVICE ACTIVITIES

Improving the quality of nursing care, stabilizing the nursing staff and maintaining job satisfaction among the nursing service employees comprised the major activities of the nursing service administrative staff during the past year.

Maintaining job satisfaction consumed time and effort out of proportion to its importance as a nursing service function because the program of economy in the State of Louisiana did not provide for salary increases for meritorious services nor did it permit the employment of the full complement of nursing service personnel. Nurse positions were abolished, and it became necessary to reassign duties to make the best possible use of the skills of the present employees, and to assure a sound and more efficient organization. Through careful review of the work required in each job, some positions were reclassified to a higher level, and this had a benign effect on the nursing staff in that it produced a willingness in the employees to perform their jobs in a more dependable and satisfactory manner.

Efforts to stabilize the nursing staff seemed futile at times. There were 103 professional nurse resignations and 96 professional nurse employments during the past fiscal year. The unavailability of professional nurses for employment on evening and night duty continues to present a problem, and although part-time nurses meet this need to some extent they do not provide continuity for patient care and adequate supervision for non-professional nursing personnel. The nursing services were supplemented by employing Charity Hospital School of Nursing students and regular staff nurses on their off-duty time. Recruitment was accelerated this year and the results are encouraging. Thirty-eight professional nurses have accepted appointments to the staff, thirty of whom are 1963 graduates of the Charity Hospital School of Nursing, and they will start reporting for duty in September. A fine brochure for the recruitment of professional nurses was completed and it will be available for distribution in the near future.

Through the Executive Committee of the Department of Nursing Service, the nursing supervisory staff has combined its resources to attain the objectives of the Nursing Service Department and to improve the quality of its nursing care. By identifying patient needs, working with the medical staff and representatives from the other hospital departments to promote understanding and better working relationships, setting up routines for better use of available personnel and by taking positive approaches to introduce progressive changes in nursing practice and the patient's environment, much has been accomplished. Its members have revised and placed in operation 22 nursing procedures and policies and 8 Nursing Records. The Executive Committee has been functioning for only a year, but its achievements indicate clearly the advantages in this type of organization for getting the job done. The administrative regulations and organizational structure through which the work of the committee can be channeled and implemented is in the process of development.

The personnel Health Clinic, which provides preventative, diagnostic and out-patient medical services to Charity Hospital doctors, nurses, students and professional employees reported 5,587 patient visits for the year. Immunizations given for influenza, typhoid fever, diphtheria, tetanus, and poliomyelitis totaled 2,949.

IN-SERVICE EDUCATION

Because on-the-job training is necessary today to prepare nursing personnel and to keep them abreast of new developments in the treatment and nursing management of the sick, the following in-service educational activities were planned and presented:

Monthly clinical sessions for the professional and practical nurse staff.

Special classes for 17 employed practical nurses who demonstrated a need for increasing their nursing knowledge and skills.

Classes in basic nursing procedures for 99 Nurse Aides II, with 59 completing the course.

Additional training in psychiatric nursing for 17 employed practical nurses and 51 nurse aides.

Brief and extended periods of observation and orientation in premature infant nursing to 5 graduate professional nurses, 51 student nurses from Hotel Dieu, Touro Infirmary, and Dillard University Schools of Nursing, 51 practical nurse students from the vocational and public school programs in New Orleans and 10 physicians from Tulane University Graduate Medical School.

An Operating Room technician course offered twice during the year for a total of twenty trainees. There are indications for future staffing in the Operating Rooms from this program, and five trainees have already applied for positions upon completion of the course.

Professional nurses were encouraged to attend the 16 meetings in their fields of job interest which were held in the New Orleans area during the past year. The response was excellent, for one or more of these meetings was attended by 213 nurses from all levels of the professional staff. In addition, 8 nurses attended meetings held away from New Orleans, and 22 nurses are enrolled as part-time students at L. S. U. N. O. and Tulane and Loyola Universities.

Plans for the coming year include a fifteen-hour course for each classification of professional nurses employed in the Nursing Service Department. These courses are designed to develop the good nurse-patient relationship which is basic to nursing and to assist the nurses to work effectively with prepared personnel.

TEACHING PROGRAMS

The L. E. Rabouin Vocational and the Booker T. Washington High Schools continued to send their practical nurse students to Charity Hospital for clinical experience. A total of 61 students were enrolled in these programs and 51 completed the course. The graduates from these programs are the main source of recruitment for practical nurse employment, but because of the low beginning salary these practical nurses have not readily accepted employment at Charity Hospital. The number recruited becomes less with each graduating class.

The Nursing Service Office staff participated in the educational programs of other hospital departments through classroom instruction to student nurses, by teaching routine nursing procedures to 44 student technicians in the Department of Diagnostic Radiology and by presenting nursing service orientation programs to the hospital's medical residents and interns, dietetic and medical technician interns, and to the personnel in research programs.

Interest was maintained in community health education and services through representation in the New Orleans Hospital Council, the Louisiana Heart Association, the Volunteer Advisory Committee of the Charity Hospital Volunteer Service, the American Red Cross Nurse Enrollment and Disaster Committees, attendance at meetings of the nursing organizations and participation in the city-wide health immunization programs.

RECOGNITION

Miss Jeanette Fontan, R.N., Assistant Supervisor in the Operating Rooms, received honorable mention from the Louisiana Civil Service League at the Fifth Annual Charles E. Dunbar, Jr. Career Service Award. We ap-

plaud their selection of a member of the nursing staff who has given so many years of unselfish devotion to duty.

There were 22 Nursing Service employees who entered into retirement during the past year, five of whom had been employed for 30 years or longer. We congratulate these employees for their years of faithful service.

We wish to express our appreciation to Sister Alphonsa, Director of the Sisters' Divisions, for her sincere interest and untiring efforts to improve conditions for patients and nursing at Charity Hospital, and to the Hospital Administrators for their guidance and assistance, and for the material benefits accorded the nursing staff.

Respectfully submitted.

Respectfully submitted,
/s/ SISTER REGIS,
Director, Nursing Service Director, Nursing Service

Dietary

The Annual Report of the Dietary Department for the fiscal year beginning July 1, 1962 and ending June 30, 1963, is herewith respectfully submitted:

ACTIVITIES AND ACCOMPLISHMENTS

From March 1962 to November 1962, the Dietary Department operated without a Director, during which time the Educational Director assumed the duties of this position. In November a new Director was appointed by the Board of Administrators.

Our staff has steadily increased to a total of thirteen dietitians, which has enabled us to improve operations.

This report will cover the activities of the Dietary Department in the following order:

- 1. Main Kitchen, Storeroom & Personnel Food Service
- 2. Patient Food Service
- 3. Formula Room
- 4. Student Nurses' Residence
- 5. Nutrition Clinic
- 6. Dietetic Internship Program

Main Kitchen, Storeroom & Personnel Food Service

New policies and procedures for handling and evaluating personnel have been established for purposes of clarifying their obligation to the department and our responsibility to them.

A chief cook was added to the staff, after having the position vacant for some time. This man has given the kitchen a tremendous boost by closely supervising all phases of food production.

Mr. Frank Roux, Meat Cutter, retired at the end of 1962. His job was reclassified to a Clerk III position for the purpose of maintaining a perpetual inventory on all food and non-food items used in the department.

Food Service Worker and Food Service Supervisor positions assigned to the storeroom and cold storage area, have been reclassified to Stock Clerks.

The Bakery no longer produces the loaf bread. All white sliced bread, as well as variety breads, such as French, Whole Wheat and Raisin, are purchased from Commercial bakeries. The hospital bakery still produces

Parkerhouse rolls, sweet rolls and quick breads. Since we have cut down on the amount of bread produced, the bakers have more time to devote to full time pastry production. Consequently, our dessert menu has been greatly improved.

Several convenience foods have been added to the inventory, particularly in the meat line. Turkey rolls are now used in place of the whole bone in fresh turkeys. This cuts the production time in half, and helps tremendously in portion control.

Ground meat is now being purchased in place of grinding the beef chuck in our own shop. It was found that ground chuck could be purchased cheaper than whole chuck.

A definite menu cycle has been established. A four week set of menus is run consecutively for three months. Eventually, it is planned to have four definite menu cycles for the entire year, using each set three times.

A short order breakast has been established in the Doctors' Dining Room, offering a wide variety of breakfast items. This is a great improvement over the rather limited and monotonous menu offered in the past.

A definite policy has been established and enforced concerning the serving hours in the Doctors' Dining Room. In the past the serving hours have been very lax.

The walls and ceiling of the entire Dietary area in the basement were painted.

Repeated repairs were necessary on the rotating oven, and extensive repairs were required on the Hobart mixer.

Shelves were installed in the walk-in deep freeze in the Main Kitchen by the Maintenance Department.

New equipment added to the food production area includes the following:

- 1-Power Meat Saw
- 2-Hobart Meat Slicers
- 1-Automatic Toaster

Comparative figures of meals served are as follows:

19	62-1963	1961-1962
Patient Meals		1,983,180 1,091,768
Total Meals	160,167	3,074,948 186,203 125,751

Comparative	rigures	OL	mear	Costs	are	as	tonows:	

	1962-1963	1961-1962
	661,389.48	\$ 980,307.07 544,934.08 92,818.93
Formula Room Food		22,547.52 \$1,640,607.60
Donated Food\$		\$ 28,579.05

Patient Food Service

Two hundred sixty-eight Freshmen, Junior and Senior Students Nurses were assigned to Medical, Surgical and Pediatric Diet Kitchens for one week. They were orientated, supervised, followed up and evaluated by the Therapeutic Supervising Dietitians.

A revised diet card for diabetics and reductions was put into use on all floors.

On 3rd, 4th, and 11th Floors, Kardex files have replaced ward sheets for special diets.

Tray carts on 3rd, 8th, 9th and 11th Floors were painted, as well as the walls of the 4th and 7th Floor pantries.

A revised method of service has been instituted on the 3rd Floor. Complete trays for the closed ward patients are now prepared in the pantry, prior to service on the solariums for the open ward patients.

A study was made on the use of plastic eating utensils for the psychiatric patients, since their use of metal utensils is very restricted. The idea was pleasing to both the patients and personnel, but the cost at this time is prohibitive.

On the 4th Floor, coffee is being served from deep wells on hot food carts, rather than from aervoids, as on the other floors.

Some definite changes have been made in the baby diets, which will be incorporated in our new diet manual.

In April, 1963, all silverware on the 9th Floor was marked with the ward number and kept in each ward, each unit assuming responsibility for its own silverware. As far as we can see in this short period, there has been a decrease in silverware shortage.

Two tray carts were purchased for the 3rd Floor and one for the 11th Floor. The toaster on 3rd Floor was declared beyond repair and a new one has been ordered.

Dutch doors have been installed in Isolation and Colored T.B. pantries. A request has been made for the same type of door in the Polio unit.

Frequent repairs on the refrigerator in Isolation necessitated the installation of a new motor.

Frequent repairs on the refrigerator in Polio resulted in a request for a larger refrigerator to be included in the budget. In the meantime, a refrigerator was transferred from another unit, which has alleviated the problem for the present.

The pantry and dishroom in Polio and the pantry in Colored T.B. were repainted.

Formula Room

Every three months, a group of student nurses from Hotel Dieu spend 2 hours in the Formula Room for observation of formula preparation and instruction by the Dietitian.

Following necessary repairs, the Formula Room storeroom on the 10th floor is again being used for supplies, rather than the main Dietary storeroom.

Routine repairs were necessary on the air-conditioner, bottle brush machine and refrigerators. The autoclave required numerous repairs this past year.

Student Nurses' Residence

The practice of monthly cost accounting report was discontinued, but a monthly inventory is still taken and sent to the main Dietary office.

Anesthesiology students are now permitted to take their meals in the Student Nurses' Dining Room.

A crash lock was installed on the back door, and sneeze guards were installed on the cafeteria counter. Three coat racks were made for the Dining Room.

Routine repairs and adjustments were made on the dish machine. The coffee urn required constant repair and is out of order 60% of the time. The steamer was checked and declared beyond repair.

Nutrition Clinic

During the past year a total of 15,860 patients were seen and instructed on special diets in the Nutrition Clinic. Of these, new reduction diets totaled 1,119 and reduction revisits totaled 2,340.

The number of diabetics instructed individually and reviewed on their diets was 3,814. Besides the individual diabetic instructions, 239 patients, relatives and attendants attended diabetic class where supplementary instruction is given weekly.

Various other special diet instructions, which include the following diets, variations, and combinations; normal, soft, bland, milk and cream, dumping syndrome, high protein, low protein, high residue, low residue, sodium restricted, low fat, high caloric, low calcium, colostomy, low purine, gluten free, low cholesterol, acid ash, high iron, high salt for infant. These totaled 687; various diet revisits totaled 1,496.

Obstetric clinic referred 6,165 pregnant women for diets, which are given in classes. Two or three classes are held each day.

5,105 were instructed on normal pregnancy diets

391 were instructed on toxemia diets

649 were instructed on toxemia-reduction diets

20 were instructed on reduction diets

Total broken appointments for revisits of reduction, and various other diets were 1,875.

Eight dietetic interns rotated through the Nutrition Clinic. Each was assigned for a period of 4 weeks, two days of which were spent with a City Public Health Nurse visiting patients and attending Well Baby Clinic.

Ninety-one student nurses rotated through the Nutrition Clinic. Each was assigned for 5 mornings of work.

The movies on pregnancy diets and diabetes were shown during five weeks. Approximately 450 obstetric patients viewed the film, and about 15 diabetic patients. The films are borrowed from the Louisiana State Board of Health, and the projector is borrowed from the Central Service of Charity Hospital.

The classroom for the obstetric and diabetic classes is in one of the two rooms which make up the Nutrition Clinic. Visual aids consist of wax food models, cardboard pictures for use with the flannel boards, boxes of instant nonfat dry milk, glasses, measuring cups, posters and pamphlets.

Dietetic Internship Program

Under the Dietetic Internship Program, nine interns completed their internship on August 31, 1962 and six on January 31, 1963, making a total of 223 since the inception of the course in 1944. Five interns are now enrolled who will complete their internship August 31, 1963.

The rotation of services and the formal class program remained essentially the same, except for routine adjustments and changes to keep up with and take advantage of current trends and requirements.

Class hours to include lectures, discussions, seminars, case studies and reports totaled 1421/2 hours. Thirty-two, one-half hour classes were given

to pantry employees weekly by dietetic interns under the supervision of the Administrative Therapeutic Dietitian.

Instead of preparing and presenting one yearly project, each intern presently enrolled is required to choose, prepare, and present two projects, one administrative and one therapeutic. After presentation to the Dietary Staff, the projects are kept in the file in the Main Dietary Office. The projects are usually of direct benefit to the department.

As a means of keeping up with latest developments in the field of Nutrition and Dietetics, field trips and meetings attended were as follows:

- Eight field trips were made to selected places outside Charity Hospital.
- 2. Four dietetic interns and two dietitions attended the annual American Dietetic Association Convention at Miami Beach, Florida in October.
- Four dietetic interns and several staff dietitians attended the annual Louisiana Dietetic Association Convention at Baton Rouge, La., in November.
- All dietetic interns and dietitians attended the Louisiana Restaurant Convention at New Orleans in November.
- All dietetic interns and several dietitions attended the special lecture of "Role of Incap in the Study and Control of Nutritional Disorders in Central America" by Dr. Moises Behar at the L.S.U. Medical School Auditorium, September 1962.
 - All dietetic interns and therapeutic dietitions attended the symposium on "HUNGER"—Disease of Millions, sponsored by the New Orleans Council of UNESCO, at Tulane University Center, April 1963.
 - All dietetic interns and several therapeutic dietitions attended the special Graduate Diet Therapy Institute for Dietitians, sponsored by the Louisiana Dietetic Association and Southeastern Hospital Conference at the V.A. Hospital, April 1963.

The practice of abstracting for the Journal of the American Dietitic Association from five medical journals was again continued. The Journals are—Pediatrics, Psychiatry, Geriatrics, Journal of Obstetrics and Gynecology, and the Journal of Gastroenterology.

Public Relations and Career Guidance activities were continued as in the past.

- A special tour of the Dietary was conducted by the dietetic interns for dietitians from several states attending the Graduate Diet Therapy Institute.
- Periodic tours of the Dietary Department were conducted for Charity Hospital Student Nurses, Student Practical Nurses and Student Medical Technologists.

Following the conditioned approval of the Charity Hospital Dietitic Internship in December, 1961 due to the inadequate number of staff Dietitians, and the insufficient amount of administrative experience, quarterly reports were requested from the Educational Director to be sent to the A.D.A. Each report included developments pertinent to recommendations made by the Liaison Director.

On September 13-14, 1962, the Liaison Director of the American Dietetic Association, visited and re-surveyed the Dietetic Internship Program. She

met with Staff Dietitians, Dietetic Interns, the Director, Assistant Director, and one of the Board Members of the Hospital.

The Sister who was Director of the Dietary Department was transferred from Charity in March 1962. Following the appointment of a new Director of the Dietary Department in November 1962, who did not have A.D.A. membership, A.D.A. approval for the training of dietetic interns at Charity Hospital was withdrawn.

The present class of interns, on their request, were allowed to continue their internship at Charity, which they will complete August 31, 1963.

As per request from A.D.A., a complete report of each dietetic intern's past and expected experience was submitted by the Educational Director to the A.D.A. Liaison Director for the continued approval of the Dietetic Internship through August, 1963.

Note: One dietetic intern was asked to resign following the probation period because of continued difficulty in adjusting to the dietetic internship due to illness.

APPRECIATION

We are most grateful to the Director and his Assistants, the Board of Administrators, The Sisters, the Medical and Nursing Staffs, the Engineering, Maintenance, Personnel and Purchasing Departments, and all other Departments of the Hospital, for their assistance and cooperation given us this past year.

Respectfully submitted,

/s/ CLYDE B. MOORE Food Service Director

Housekeeping

The turnover of personnel, including Linen and Sewing Sections and Professional Student Home 79. Of this number there were 58 resignations and 21 removals. Five retired by age limit regulation.

Five Custodial Worker positions and one Hospital Matron position were abolished for budgetary control; one messenger position from Record Library was transferred to Housekeeping and reallocated to a Custodial Worker II classification.

Four Custodial Supervisors were promoted to vacant positions in higher classifications; five Custodial Workers were transferred to other departments with promotion.

On May 1, 1963 all eligible employees received a step increase in salary which contributed to improved morale.

Three hundred thirty-four mattresses were renovated; 300 for adult beds, and 34 crib mattresses.

Window cleaning services were performed by the National Building Services and Maintenance Company as per contract.

Pest control services were carried on satisfactorily by the Charity Hospital pest control workers. Prompt attention was given to all requests to fog areas for infection control and fogging for insect extermination.

A better quality of floor cleaning materials and floor finishes purchased during the past year, has improved standards of cleanliness and greatly reduced the amount of labor required to keep floors in good condition. The terrazzo floor in the Cafeteria of the Student Nurses Residence was stripped and resealed with terrazzo seal.

The oak floors in three rooms on first floor of Professional Student Home, Ladies Building were repaired, machine surfaced and filled, and new plastic finish coating applied.

The following linen replacements were made:

9000	Bed sheets	022	20 95 Bit 9
			Table Cloths, damask
	Roller and RX table sheets		Napkins
	Crib sheets	108	Coffee bags
	Bedspreads	540	Mattress covers, plastic
	Pillow cases	59	Crib mattress covers
	Blankets 66 x 90	42	Bassinet mattress covers
	Crib blankets 36" x 50"		Plastic pillow covers
1464	Receiving blankets	106	Roller pads covered
	Pillows	23	RX table pads covered
7600	Patient gowns	416	Blood P. apparatus cuffs
	Pajamas		O. R. leggings
	Patient robes		Restraints
11,152	Birdseye diapers		Spring covers
57 cs	Disposable diapers 400/cs		Bathroom curtains
22 cs	Disposable diapers 576/cs		Cubicle curtains
13 cs	Disposable diapers 600/cs		Aprons
1789	Large pads		Doctors caps
897	Bassinet pads		Operating gowns
9 cs	Disposable pads 300/cs		Scrub shirts
	Bath towels		Scrub trousers
8000	Huck towels		Nurses first gowns
1824	Kitchen towels		Nurses second gowns
	Surgical towels		Grey nurse aide gowns
	Terry wash cloths		Smocks, reversible front
76 cs	Disposable wash cloths 500/cs		Attendant jackets
6712	Sterile double wrappers	12	Acceluant Jackets
4 10 10	are deduce arappers		

498 Slit sheets and special pieces 2 sets Draperies, Drs. lounge and office, Prof. Student Home

We gratefully acknowledge the interest and support which has been extended to the Housekeeping Department and Linen Section by the Board of Directors, Dr. L. J. Kerne and his Administrative staff during the past year.

Respectfully submitted,

/s/ SISTER CLARISSE Director of Housekeeping

School of Nursing

ACCREDITATION

The School is approved for accreditation by the National League for Nursing and the Louisiana State Board of Nurse Examiners. A re-visit for continued national accreditation is scheduled for 1968; an interim report to this Agency will be submitted in 1965.

EDUCATIONAL PERSONNEL

There were ten resignations and thirteen replacements in the teaching personnel for the current year. The percentage of turnover according to education and preparation was as follows:

Instructor I (R.N.)	100%
Instructor II (R.N. plus B.S.)	25%
Instructor III (R.N. plus M.S.)	0

The Instructor I position was instituted as an emergency measure. It will be noted that there is a 100% turnover in the Instructor I category. This indicates a need to reclassify this position. And this is being done as we locate qualified teacher applicants having their R.N. plus a degree in nursing.

In order to advance the teaching qualities of our instructors and to enrich their educational background experience, our staff education was devoted to personal improvement. Two programs namely, "Change in Education" and "Cultural Awareness and the Nursing Curriculum" benefited the faculty. Throughout the year there was faculty attendance at Conventions, Conferences, Workshops, and Study Sessions, some of which are named herein:

Seminars such as "The Nurse and the Alcoholic", TAGNO "Unusual Chest Diseases"; Workshops on Perspectives in Nursing Education, Evaluation of Students in the Clinical Area, Disaster Nursing, and the American Red Cross First Aid Instructor's Course; Conferences for Instructors in Medical-Surgical Nursing, Nursing of Children, Obstetric Nursing, Psychiatric Nursing, and the National League for Nursing Regional Conference at Williamsburg, Virginia; annual conventions of the Louisiana League for Nursing and the Louisiana State Nurses Assn.; also included were Louisiana Heart Association, Scientific Session for Nurses, "Nursing Care of Cardiac Surgery Patients", the United States Office of Education Exhibit "Programmed Instruction and Teaching Machines", and In-service Departments, Nursing Service New Orleans Hospitals "Legal Aspects of Nursing".

STUDENT WELFARE

Total number of residents is 295. Charity students number 263. Affiliates have ranged from seven to 35 students, and the anesthetists have ranged from 26 to 53 students. There are four staff members.

The school, built in 1939, is in need of major repair and renovation. Waterproofing of the exterior of the building has been completed. Formal request has been made for major repairs such as plastering, new flooring throughout, repair and replacement of plumbing, painting, etc., and an estimated cost to bring the building to first class condition is under consideration by the State Bonding Commission.

Refurbishing of the interior must be considered. Beds and desks, chairs have been used constantly since 1939. As of now, one small desk is being

shared by two or three students. Kitchen units consisting of stove, ice box, and sink have outlived their usefulness. A small home type refrigerator has been provided on various floors but more are needed. One automatic washing machine to a floor is necessary. Dryers in strategic areas are needed.

Furnishings for a modern recreation room are needed. The Lounge which is the only area suitable for parties, teas, and extra-curricular functions requires some new pieces of furniture and others to be upholstered and covered.

Modern living makes air conditioning of the entire building essential. But if this is to be placed in the future, immediate air conditioning for the ground floor and the first floor are requested. These two floors would include the classrooms and the offices.

In order to accommodate large classes being admitted and additional faculty, the Education Building is undergoing renovation and repair. A second Laboratory, classrooms and offices, and a small conference room are planned. Dividing the large class into three and four sections will decidedly decrease the number of drop-outs. Here again, it is requested that serious consideration be given to air conditioning the Education Building.

AFFILIATIONS

The Administration approved discontinuance of affiliations with out-ofstate schools as soon as possible. This decision was based on increased enrollment in our own school and the inability to recruit qualified teachers. Six schools have been terminated; one is pending. At present, we hold contracts with two in-state schools. These schools have been requested to provide their own instructional personnel while students are here on affiliation.

RECRUITMENT AND FINANCIAL AID

Open House for high school students in February 9, 1963, was attended by 267 students representing 30 high schools. At other times during the year, high schools requested tours of the hospital and the school. One thousand, two hundred forty-six catalogs were mailed in answer to inquiries of interest in entering our school.

Four hundred and nine applications were processed. One hundred thirtyseven were accepted; 78 of these are from Louisiana. 129 were rejected.

The hospital granted loans of \$110.00 to six students. Scholarships sponsored by various civic and philanthropic organizations were granted to 13 students, amounting to \$4,861.00. The Kellogg Loan Fund at Charity granted 86 loans totalling \$2,809.00.

Students employed at Charity Hospital on a pay basis during their free time worked a total of 2,153 days during this fiscal year ending June 30, 1963.

RECOMMENDATIONS

Instructor I positions be reallocated to Instructor II in order to have sufficient qualified teachers to teach in smaller groups.

Establishment of three Instructor II positions in the Faculty, if 110 students are promoted to the 2nd year in 1964.

Naming the quota of Freshmen to be admitted in 1964 in October, 1963 so that there is time for request of additional Faculty positions on budget requests in November.

Repair and renovation to School of Nursing and Education Building.

Eventual building of a Gymnasium-Auditorium and some classrooms over the parking lot on Perdido Street if hope for permanent placing of the educational unit is diminished.

ACKNOWLEDGEMENTS

The continued interest of the Administration and of other Department Heads of the Hospital lends a stimulus to produce an achievement in the School of Nursing to meet the confidence placed in the Faculty and Staff of the School of Nursing.

The establishment of the Advisory Committee of the School of Nursing as requested by the Medical Committee has given direction to projects that have brought them to fruition with promptness.

Sister Pauline's leadership in the School through many years has drawn the School of Nursing to methods of education in Nursing that gives the School a place with the foremost. Advances made in the last five to seven years as evidenced in reviewing reports, minutes, etc., constitute an achievement that is remarkable.

Respectfully submitted,

/s/ SISTER BLANCHE Director. School of Nursing.

NARRATIVE PROGRESS REPORT COMMUNITY CANCER DEMONSTRATION PROJECT

Grant No. T2001A62

Two cytotechnology students, Mrs. Sharron Batten and Miss Jean Smith, who completed their didactic training during the period covered by the first report have now almost completed their practical training. They have both done exceptionally good work and Mrs. Batten has accepted a position in a diagnostic cytology laboratory in Baton Rouge, La. Miss Smith will continue to work in our laboratory after completion of her training. The students in their didactic training have now taken positions for practical training. Mrs. Dear will continue in our laboratory. Mrs. Gulick will work in the Oschner Foundation Hospital, New Orleans, La. Mrs. Jones will work in a diagnostic cytology laboratory in Baton Rouge, La., and Miss Brown will work in a laboratory at the Emory University Medical Center in Atlanta, Georgia. We now have six new students enrolled and these people are a well qualified and interested group. Recruitment now seems to be an easy matter with the majority of the students being young college students.

The volume of material from the hospital continues to increase in quantity and variety. We are now processing oral scrapings in increasing numbers from the oral surgery clinic of the hospital. One of our resident pathologists, an exchange fellow from Costa Rica, has been working on gastric carcinoma and has collected a number of good gastric washings.

The school has been approved by the Council on Medical Education and Hospitals of the American Medical Association concurring with the recommendation of the Committee on Cytotechnology of the Board of Schools of Medical Technology (ASCP) for the training of six students concurrently. New equipment has been purchased for the projection of color photomicrographs and with funds requested in this year's budget I plan to purchase equipment to enable two observers to study slides concurrently and also to directly project the slides for viewing of a small group.

Dr. Carlos Pereira, a pathologist from Costa Rica, completes one year of training in the cytology laboratory in August 1963, and he plans to return to Costa Rica to establish a diagnostic cytology laboratory. The program of offering at least one month's training in the cytology laboratery each year for the resident pathologists at Charity Hospital and the fellows in pathology at the Tulane and LSU Medical Schools has been successful and is being continued. It would be preferable to give these men more training in cytology than just one month per year but this seems to be the maximum that is available in their training program at the present. To increase exposure to interesting cases, the current interesting cases are kept in a special folder and are near an available microscope for residents and cytotechnology students to review each week. A current follow-up of suspicious and positive cases is maintained on all cytologic applications.

Sincerely yours,

NELSON D. HELMQUIST, M. D.

NDH:tm ce: Dr. Emma S. Moss

ELECTROCARDIOGRAPH

The accompanying report shows the work performed in the Heart Station from July 1, 1962 through June 30, 1963. The figures refer to the number of electrocardiograms taken in each month, and to the number of arterial oxygen saturation studies, cardiac catheterizations, angiocardiograms, and cardiac flouroscopic examinations.

Many sound tracings of the heart were made during the current year but the breakdown by months is not available although the data were placed in the patient's records.

During the year cardiac clinics were conducted every afternoon, Monday through Friday, in order to maintain a closer check on patients with heart disease. There was also a pediatric clinic which is conducted every Friday.

ELECTROENCEPHALOGRAPHY

The following is the annual report of the Department of Electroencephalography for the year 1962-1963.

July 1962 August 1962 September 1962 October 1962 November 1962 December 1962	115 91 112 100 76	January 1963 February 1963 March 1963 April 1963 May 1963 June 1963	88 90 88 91 115 92
TOTAL EEG RECORDING	3S	1	,173
TOTAL FETAL HEART I	RECORD	DINGS	30

There were 14 holidays. 209 EEGs went unperformed for reasons as follows: 100 appointment cancellations too late to substitute, 10 patients (mostly psychotic) refused test on arrival at laboratory, 60 patients failed ever to appear, 18 requisition forms unsigned by referring doctor and/or otherwise incomplete, 21 patients for whom EEG appointments had been made were discharged from hospital without cancellation of appointments.

Respectfully submitted.

/s/ H. THARP POSEY, M.D. Director Brain Wave Station.

HTP:pj.

LUNG STATION

During the fiscal year 1962-1963, the Lung Station continued to function primarily as a service unit. In addition, two fellows of the American Thoracic Society were given training in the teaching, diagnosis, and management of pulmonary disease.

Routine ventilatory studies were performed on 374 patients. More extensive studies of obstructive ventilatory disease were carried out on 642 patients. The dynamics of breathing and the distribution of ventilatory function were evaluated in an additional 148 patients.

Studies of respiratory gas exchange were performed on 83 patients.

Special diagnostic studies consisting of such procedures as drill biopsy, thorocentesis, and the collection of bronchial exudate after the inhalation of a heated aerosol of hypertonic saline and glycerine were a significant part of the Lung Station service. These studies were performed on 518 occasions.

Because of the inability of the division of Inhalational Therapy to provide service for out patients, a limited number of such treatments were given to the most needy patients. Two hundred and fifteen such treatments were administered.

Respectfully submitted,

/s/ JOHN H. SEABURY, M. D. Director, Lung Station

TUMOR REGISTRY

PURPOSE

- 1. To provide the medical profession of this Hospital with statistical and other data to indicate the size and nature of the cancer problem at this Hospital since January 1, 1948.
- To make available to the medical staff information for research studies, for the evaluation of therapy, for teaching, and for demonstration.

ADMINISTRATION

The governing Board of the Registry consists of the following representatives of the sponsoring agencies listed below:

Charity Hospital of Louisiana at New Orleans Dr. Leo J. Kerne

Dr. Manuel Garcia

Louisiana State University School of Medicine
Dr. W. W. Frye
Dr. Ronald A. Welsh
Tulane University School of Medicine

Dr. E. T. Krementz, Chairman of the Registry Board

Dr. Robert Craft Smith

American Cancer Society, Louisiana Division, Inc.

Dr. C. C. Sprague

Louisiana State Board of Health

Dr. J. M. Bruce

Louisiana State Medical Society

Dr. Ambrose H. Storck

REGISTRY STAFF

Mrs. Marion Wogan, who had served as Director of the Registry ever since its organization in 1947, asked to be relieved of her duties as Director effective July 1, 1962, and was named Technical Consultant to the Registry. Mrs. Wogan was succeeded by Miss Brent S. Robertson, who had been employed June 18, 1962,

The following eight staff members, in addition to the Director, have carried out the operations of the Registry during the year:

Mrs. Marjorie S. Krennerich, Analytic Assistant; Mrs. Marie Louise Nolan. Follow-up Investigator; Mrs. Loretta Soles, Mrs. Margaret Alexander and Miss Emma Lou Schwab, Abstractors and Code Clerks; Mrs. Betsy Green, Key-punch Operator; Mrs. Susan Rauber, Record Clerk; and Mrs. Thelma Ellen Ziegler, Typist. Three of these staff members were employed during the year.

FINANCIAL SUPPORT

Support is derived from Charity Hospital, grants from the American Cancer Society, Louisiana Division, Inc., and the Louisiana State Board of Health, and from a contract with the Cancer Chemotherapy National Service Center of the National Cancer Institute.

STATUS OF RECORDS

As of June 18, 1963, the Registry had on file abstracts and punch cards summarizing pertinent data on 25,327 malignancies diagnosed in the fifteen year period, 1948-1962, in patients seen at Charity Hospital.

Summary of 15-Year Period, 1948-1962

A. Malignancies by Race and Sex

Race: White . Colored		12,760 12,567
Total		25,327
975		13,159 12,168
Total	***************************************	25,327

B. Malignancies by Most Frequent Sites of Occurrence

	Total	Colored	White	Male	Female
Skin (not including melanoma)	3,253	231	3,022	2,004	1,249
Cervix	3,201	2,159	1,042		3,201
Lung	2,339	990	1,349	2,094	245
Breast	1,947	1,203	744	20	1,927
Prostate	1,833	1,181	652	1,833	
Stomach	1,409	1,009	400	998	411
Table 1					

The above six sites account for more than 50 per cent of the total number of malignancies.

C. Status of Patients:

	Number	Per Cent
Alive at last contact Dead Untraced	17,766	29.5 70.1 00.3
	25.327	99.9

D. Hospital Admissions by Race and Sex (From Medical Record Library Reports)

Race:		
White .	***************************************	294,878
Colored	***************************************	686,584
Total Sex:	***************************************	981,462
Male		383,253
Female	***************************************	598,209
Total	***************************************	981,462

REPORTS

An analysis of the Registry's records for a twleve year periol (1948-1959) made by Mr. Herbert Seidman of the American Cancer Society's Statistical Research Section, was received during the year and has been distributed to the members of the Registry Board of Directors, the libraries of the Hospital and of the two medical schools, Dr. Louis Burroughs, the Loyola School of Dentistry, and the heads of the following departments at both medical schools: Surgery, Medicine, Pathology, Radiology, Obstetrics and Gynecology, Dermatology, and Bio-Statistics.

During the year, forty-five studies were done for thirty-six physicians. The data given out ranged from a simple analysis of the distribution of cases of carcinoma of the female genital tract by race and specific site to complex analyses of the Hospital's experience with cancer of the prostate, stomach cancer, and cancer of the female genital tract. In addition, information about fifty-seven individual patients (in most cases, follow-up data) was given to other Charity Hospital departments and registries of other hospitals. Four doctors were given help in building special codes. The mechanics of the

operation of a registry were discussed with visitors from Salt Lake City, Utah, Columbia, South Amercia, and Uganda. In response to requests, this type information was also sent to the Ohio State University Hospital and to the Massachusetts State Health Department.

DEVELOPMENTS DURING 1962-1963

Addition of Second Medical Consultant

Dr. Robert F. Ryan, our medical consultant, has not been able to give the Registry as much time as he has given in the past. Dr. Ronald A. Welsh was, therefore, asked to serve as a second medical consultant. This means that the Registry Staff now has the benefit to help from two specialties (Tulane Surgery and L.S.U. Pathology).

Cooperative Program with the Tulane Bio-Medical Computing System

In recent years, the doctors on the Hospital Staff have been asking the Registry for more and more sophisticated statistical studies. Producing some of these analyses from our cards with our I.B.M. sorter has required so much time that other doctors have been obliged to wait an unreasonable length of time for their studies. For this reason, we have placed duplicates of our cards on tape at the Tulane Bio-Medical Computing System which can handle such requests quickly and efficiently. It is our plan to use our own facilities whenever this is feasible and to ask the Computer Center to take care of the studies which would be unduly time-consuming for us to produce. The Center has agreed not to release information from our records to anyone but the Registry. The identities of the patients do not appear on the I.B.M. cards.

Training Program

At the request of the Tulane Department of Tropical Medicine and Public Health, the Registry agreed this year to train a young woman from Cali, Columbia, to help establish and operate the Registry at the Hospital of the Universidad Del Valle in Cali. The student spent four months in the Registry on a tutorial basis.

Tulane Tumor Conference

Beginning March 20, 1963, two members of the staff of the Registry have regularly attended the Tulane Tumor Conference. This has proven helpful to the Registry Staff, and the Staff has occasionally been able to contribute pertinent statistical information.

Exhibit

An exhibit based on statistics for a twelve year period was displayed at the meeting of the Louisiana State Medical Society, May 5-8, and was later set up in the Hospital lobby, June 24-July 8, 1963.

Cooperative Program with the National Cancer Institute

The terms of the Registry's contract with the End Results group, Cancer Chemotherapy National Service Center, National Cancer Institute, for 1962-63 were fulfilled, and the contract has been extended.

Dr. E. T. Krementz, Chairman of the Registry's Board of Directors, served on the Executive Committee of the End Results group during the year, and Dr. Robert F. Ryan served on the Medical and Technical Advisory Committee.

Dr. Ryan attended the committee meeting in Ann Arbor in March, 1963, and he, the Registry Director, and the Analytic Assistant attended a Workshop in Bethesda, Maryland, May 15-16, 1963.

Respectfully submitted,

MISS BRENT S. ROBERTSON,
Director

BSR/scd

INTAKE

TRAFFIC SUMMARY

Total Intake traffic volume for the year in the Colored Section was: 49,211 Interviews processed.

In the White Section:

23,650 Interviews were processed.

In the Colored Section:

14,266 applicants were made Eligible.
10,136 applicants were made Ineligible.

10,136 applicants were made Ineligible.
4,480 applicants were given Temporary Eligibility.
1,943 applicants were given Temporary Eligibility.

1,943 applicants were given Limited Eligibility.

4,795 applicants were DPW cases, and

13,591 applicants are still being investigated.

In the White Section:

5,344 applicants were made Eligible.

6,348 applicants were made Ineligible.

1,480 applicants were given Temporary Eligibility.

2,817 applicants were given Limited Eligibility.

1,701 applicants were DPW cases, and

5,960 applicants are still being investigated.

Both sections registered declines compared with volume last year:

7,993 fewer Interviews were processed in the Colored Section. 220 fewer Interviews were processed in the White Section.

Average number of Interviews processed in the Colored Section was:

Daily Weekly Monthly 134,301 945.71 4100

Average White Interviews processed were:

Daily Weekly Monthly 64.290 454.42 1970.10

The highest monthly volume registered in the Colored Section Was: 5,793 Interviews processed (July, 1962)

The lowest monthly volume registered in the Colored Section was: 3,335 Interviews processed (December, 1962)

In the White Section the highest monthly volume registered was: 2,286 Interviews processed (July, 1962)

And the lowest monthly volume registered in the White Section was: 1,549 Interviews processed (December, 1962)

SOCIAL SERVICE

Workers from this department are assigned to all wards and clinics, and to the Accident and Admitting Rooms. They are responsible for helping patients with individual and family problems resulting from illness and disability, for assisting with such administrative processes as discharge planning, for expediting diagnosis and treatment through provision of home studies and social histories, and for other such enabling services as helping to secure prostheses, appliances, and the like. These kinds of help are needed by a considerable proportion of the population of the hospital, because the patient load consists of families in the lowest income group, who have little or no margin of stability, financially or socially. Because of these circumstances, serious illness or disability is likely to precipitate a disastrous situation which the patient cannot handle without outside help. Such help may be found within the circle of the patient's family and friends, or from other social agencies in the community.

SERVICES TO PATIENTS

Services to patients cover a wide range. In some instances, only a contact is needed, as for example, when a patient's needs may be very quickly assessed and he can be directed to the proper resource for help. In others, there may be extremely complicated problems of family financing, medical needs, and emotional reactions, which require careful study and evaluation, close cooperation with hospital staff and with workers from other social agencies, and skilled counselling and guidance to patient and family. Some of the kinds of problems are: elderly, chronically ill persons who require institutional care or nursing care in their own homes; younger, but severly handicapped persons needing help with plans for rehabilitation; families deprived of the support of the wage-earner; dependent and neglected children.

A total of 42,898 patients were seen in Social Service during the past year. In the larger number of these, emphasis was on the immediate, presenting need, without exploration beyond this point. There are two reasons for this: in many cases there is no need for further exploration; in the second place, with a staff the size of the present one, it would be physically impossible to do otherwise. However, in an appreciable number of cases (14,210), the workers were able to make more thorough studies of the total problem situation, and to plan treatment with longer range goals in sight. Permanent records were kept in these cases.

It would be neither practicable nor desirable for a social worker to see every patient who comes to the hospital. Not every patient needs help from this department, and it would be poor economy to use the workers to screen those who do not. Therefore the patients needing help must be brought to the attention of Social Service. Referrals are accepted from any source, but are particularly encouraged from hospital staff, who in their close association with the patient, recognize problems which arise in the course of medical treatment. The sources of referral for the year are as follows:

Source of Referral	No. of Patients
Hospital Personnel Department of Public Welfare Other Agencies Patient or Patient Group	2,806
TOTAL	-

Patients of this hospital come from all parts of the State, and in addition a small number of non-residents are given emergency treatment. The patients

served by Social Service follow the same pattern. The place of residence of patients known to Social Service for the past year is as follows:

Place of Residence	No. of Patients
Orleans Parish Other Parishes Other States	13,182
TOTAL	42,898

A method of helping patients which is new to this department has been initiated on a very limited basis this year. It consists of working with groups of patients having similar problems or backgrounds. The use of this method is increasing in hospitals, and in many ways is particularly well suited to this type of setting. Two groups have been activated here: the first with the relatives of very disturbed patients on psychiatry wards, and the second with emotionally disturbed adolescent boys of very deprived backgrounds who have been in trouble with the law. The goal with the first group was to help them to understand the problems and needs of their patient-relatives, with the obective of preparing them for the patient's return to the home. It is believed that with such preparation, the family can help to avoid future breakdowns and subsequent rehospitalization. The aim of the second group was to use the dynamics of group interaction to help the boys achieve a better social adjustment, and consequently avoid further trouble in the community. In each group the social worker functioned as the leader of the group, with close psychiatric consultation. The concept of working with patients (or families) as groups deserves serious consideration in the hospital setting. One factor is that the hospital forms a ready made group in that the patients are already together physically, and that there are many similarities in their problems. Not to be overlooked, also, is the fact that this may be at least a partial answer to the ever-present problem of insufficient staff. If this particular method proves successful, it will mean that a greater number of patients may be reached.

USE OF FUNDS

The Department has very limited funds which may be used for medical emergencies. These emergencies include need for medication for out-patients, transportation, temporary shelter following discharge or during clinic visits, and appliances such as braces, crutches, glasses, and prosthesis. The volume of need is great, since the vast majority of Charity Hospital patients are of marginal or submarginal income, who are not able to meet these additional expenses attendant upon illness. Other social agencies in the community are called upon to help in most instances, but there are many situations in which the patient is not eligible for assistance from another agency, or in which the need is for immediate action which cannot wait for the process of referral and certification. By far, the greatest problem is that of provision for medications for out-patients; and it grows greater each year, as new drugs are developed, and more and more patients can be treated on an out-patient basis. It is important that this particular need be met as far as is possible, not only because it saves the patient the ordeal of hospitalization, but also because of the saving in the actual cost of hospitalization.

Only a small part of the total need can be met through the funds which are available to the Department, and many patients must go without the medications which are prescribed. This is a situation which has grave consequences for the patient, and may be extremely frustrating to the physician, who may go through the entire process of diagnosing a case, and prescribing treatment, only to find that the patient cannot afford to buy the medications prescribed. At the present time, there appears to be no practicable solution to this problem.

The funds in use derive from hospital appropriation, bequests, and special donations as follows:

Funds	Amount Available
Stauffer-Eastwick Patients Welfare Weil Convalescent Insulin Fund American Cancer Society Special Donations	\$ 4,800.00 1,200.00 360.00 6,000.00 985.85 1,024.35
Funds were expended as follows: Reason for No. of	
No. of	Amount

Reason for Using Fund	No. of Patients	Amount Expended
Medication Transportation Maintenance Appliances	401 21	\$11,466.09 560.00 120.00 2,082.61
TOTAL	15,485	\$14,228.70

STAFF

The major problem in the Department continues to be that of recruiting and maintaining professional staff. The rate of turnover is extremely high, and was greater this year than for the previous year. With an allocated 31 positions, there was an average of nine vacancies, as compared with seven for the previous year. Seven full time and two part time workers resigned. There were replacements of 11 full time workers, but three of these were for summer employment only. The high rate of turnover together with the unfilled vacancies creates a severe handicap in the overall functioning of the department. Service assignments must be shifted too often, meaning loss of continuity in service coverage, supervisory staff is overloaded covering unassigned services, or workers must be doubled up. This tends to damage morale as well as to cut into the quality and quantity of service given.

Difficulty in recruiting and maintaining staff may be attributed to several factors: the salary level is considerably lower than that for similar positions in other agencies; working conditions are uncomfortable due to overcrowding of office space in one unit, and lack of air-conditioning in another; there is an acute shortage of qualified social workers in the country as a whole, with the result that there is stiff competition for the ones who are available.

The Department has continued to participate in the training program for social workers. This year there have been twelve students from the Tulane School of Social Work, and two from the LSU School of Social Welfare. These students are assigned to the hosiptal for their practical experience, under close supervision from the schools. They are in their second year of professional training, and are graduated with a master's degree in social work.

As in previous years, the Department has had the services of volunteer workers who function as case aides, receptionists, and clerical assistants. Two have been very devoted in their work for the department on a regular basis, others have been most helpful in their assignments on special projects.

Respectfully submitted,

/s/ MARIGAYLE H. HART, ACSW

Meetings Attendance	260 4,927

The following are some of the activities of the members of the Charity Hospital Guild for the Hospital and for the Patients.

In addition to making and wrapping surgical dressings, fifty-two (52) baby layettes were made and given as needed. A large amount of new and used clothing, shoes, books, magazines, scrapbooks, picture puzzles, games and toys were distributed. Seventy-five (75) pairs of slippers and fifty (50) wash cloths and soap were given to the Orthopedic patients.

At Christmas several hundred dolls and toys were given to the children on the ninth floor, and to the children in the tubercular, polio and contagious wards, by Mrs. Walter Grunning, Chairman of the Doll and Toy Committee. Ice cream, cakes and candies were also served to these children.

At Christmas and Easter, a party was given to the children of the tubercular and polio wards by the Colored Willing Workers of the Guild.

Three parties were given by members of the Guild, to entertain the ladies of the Golden Age Club. These ladies give their time weekly to wrap surgical dressings at the Guild room.

Special attention is given the male patients in the John Dibert Dept., by the Magnolia Branch of the Louisiana Sunshine Society, Mrs. B. H. Gilden President. This Society gave two parties for these patients, one party at Christmas and one party at Easter.

At the Christmas party each patient received two Tee Shirts, two pairs of socks, a pair of slippers and two packages of charms with \$1.00 bill attached. One dozen decks of playing cards, cigarettes and matches were distributed. Bingo for prizes was played at this party.

At the Easter party each patient received an Easter Rabbit bank filled with chocolate eggs. Cigarettes and matches were also distributed and entertainment was furnished.

The Magnolia Society also donates four pounds of coffee a week to these patients.

In addition to the above the Magnolia Branch of the Sunshine Society also entertained the children of the polio and tubercular wards with a party at Christmas and Easter.

These ladies meet weekly to wrap surgical dressings in the Guild room. They also make baby garments at home to be added to the baby layettes. Each year they give a complete layette to be presented to the first baby born in the Hospital on Christmas and New Year's Day.

ENGINEERING

BOILERS

The six boilers in the Power House with a capacity of 2,850 Horse Power are chemically treated and operated on monthly intervals, and inspected yearly, externally and internally by the Travelers Insurance Company's Inspectors; cleaning of the boilers are made immediately after taking out of service. If repairs are needed between yearly inspections, the Inspectors are called and recommendations are completed. Painted Main Gas Line for boilers in basement of Power House which is done yearly to prevent deterioration because of heat and condensate moisture.

HEATERS ON MEZZANINE FLOOR IN POWER HOUSE

The heaters supplying Hot Water to the boilers in Power House, Laundry and all Hospital Buildings are in satisfactory condition, they are operated on monthly intervals.

BOILER FEED WATER PUMPS

Installed a New Peerless 3" Type T.U.—13½ two stage centrifugal pump, turbine driven, purpose to deliver water to the boilers when electrical power occurs, can be used in normal operation.

ICE PLANT

Installed new parts on Vilter Ammonia Compressor, compression oil rings, bearings, wrist pins and oil pump. Reconditioned the entire interior on the No. 1 Brine Tank for making ice, painted the tank with a special rust preventative paint, made new top covers for same. Installed new shaft seal on York V.W. Ammonia Compressor.

WATER SOFTENERS

Cleaned stone bed thoroughly in each Brine Tank, scaled and painted exterior of the Four Water Softeners, also routine repairs on units.

ICE WATER SYSTEM

Repaired No. 1 York 75 ton Ammonia Compressor, repairs consisted of: New compression and oil rings, new crank shaft bearings, changed oil in base.

WORTHINGTON AIR CONDITION COMPRESSORS (1000 Tons to Main Building)

Made yearly inspection on both No. 1 and No. 2 Freon Compressors, checked alignment, installed New Thrust Bearing, repaired purge units, put 200 lbs. of Freon Eleven (11) in Evaporator No. 2 Compressor, cleaned condensors, painted interior and heads of both units. Two 350 tons Trane Air Condition Units were installed and completed on the Mezzanine Floor in the Power House to refrigerate and deliver chill water to certain sections of the Main Building for Air Condition, operating OK.

Installed a 5 ton General Electric Air Cooled Air Condition unit in the Study Room (Sister's Home).

Run 1000 K.W. Murray Turbo and 1000 K.W. General Motor Diesel Emergency Generator semi-monthly throughout the year.

Made several Plant shut-downs for necessary repairs during the year.

Employees in the Engineering Department repair window units, ice making flake and cube machines and all equipment operated by the Engineering Department in the Hospital.

Hoping this report meets with your approval, I remain,

Yours very truly.

/s/ WILLIAM H. SUTHERLAND Plant Engineer

PHARMACY

Special Prescriptions Filled	
Narcotic Prescriptions Filled	
TOTAL PRESCRIPTIONS FILLED	230,088

This past fiscal year was a record-breaking year as evidenced by the total number of prescriptions filled. The Pharmacy services all the wards, including such outlying areas as the Tulane Metabolic Ward, Tulane Arthritis Unit and the Tulane Cancer Clinical Research Unit.

In the general manufacturing laboratory and prescription counter, a total of 47,746 gallons were made. These included syrups, elixirs, liniments, lotions, mixtures and laboratory stains. 940 pounds of ointments and 1,991,000 tablets were also manufactured.

In the solution area, the total number of bottles of sterile solutions manufactured reached 210,415. These include 1000 cc and 500 cc Sodium Chloride, Dextrose, etc. This figure exceeds last year's by 14,693 bottles, and over the past 9 years a gradual increase each year is noted from the 1954-55 figure of 114,619 bottles. This year almost doubles that production. In addition to this, 94,347 bottles of small size sterile solutions were made, and the number of sterile vials of vitamins, potassium chloride, phenobarbital, mineral oil, etc., was 27,837. Various dilutions of allergenic vials made for use in the clinics numbered 1,086. The grand total for the solution room stands at 333,685 units as compared with 302,049 units last year.

This represents a tremendous savings to the hospital as commercially prepared products would cost many times our manufactured items.

The department participated in the teaching program of Pharmacy Students from Loyola University, and the Pharmacy Committee continued to function regularly, meeting to consider all requests pertaining to drugs.

Attached is a list of antibiotics and other classes of drugs purchased during the year.

Respectfully Submitted,

/s/ SILVIA BING, Director, Pharmacy Department

MAINTENANCE

The Maintenance Department when fully staffed consist of 151 workers. At the present time there are 14 vacancies.

This department has handled 26141 written requests for maintenance during the past year. The following figures are given to indicate the volume of work and type of service rendered.

- 30 renovation jobs completed.
- 43 serious leaks due to pipe deterioration.
- 13 major repairs to equipment.
- 10 pieces of new equipment installed.
- 1,285 pieces of new furniture or equipment manufactured under \$100.00.
 77 pieces of new furniture or equipment manufactured over \$100.00.
- 5,173 gallons of painting material used.
 - 966 new keys issued.
- 4,025 pieces of metal furniture completely stripped and refinished.
